	Field	Contents
110	AIDFileName	Unique AID file name containing userID and time/date information
112	Description	Text field entered by discussion participant when creating the comment contained in the AID file named above. This field is used by the TIC Workstation software to search for specific topics to play back.
114	LastPlaybackDate	This field records the date/time that the discussion participant last played the AID file. It is used to identify new, unviewed content.
116	Authorization	A security and access code field that defines the rights of the discussion participant to manipulate the AID file named (e.g. to delete or archive the file).
118	ParentItem	This field contains the ID of the logical parent of this entry. This field can be used to organize the discussion in a differing logical order, e.g. by topic or participant.
120	ChildItem	This field contains the ID of the logical parent of this entry. This field can be used to organize the discussion in a differing logical order, e.g. by topic or participant.
122	LeftSiblingItem	This field contains the ID of the logical sibling preceding this entry. If the discussion is organized in pseudo-chronological form, this is the DSOB item immediately preceding this item in the chronology.
124	RightSiblingItem	This field contains the ID of the logical sibling following this entry. If the discussion is organized in pseudo-chronological form, this is the DSOB item immediately following this item in the chronology.
126	Status	This is an internal field used by the TIC Server to identify the state of this item, e.g. archived or active.
